

This is the HTML that I've added into the Center For Entrepreneurship homepage- it includes all of the CSS styling and javascript inline (not the greatest practice but CASCADE had multiple problems when I tried traditional methods).

I put all of the names in the dropdown inside `<a>` tags in case you wanted to create links to descriptions of each person. In that case, all that needs to be done is to replace the # symbol in each href with links.

These buttons cannot be edited directly from the UI view in CASCADE- from the normal editing window there is a small html button on the toolbar to access the code. To edit these buttons scroll to the bottom of the html popup window.

Everything I changed should be pretty self explanatory... I changed a lot of pictures in to editable content. The faculty and staff page really needs to be published ASAP but there are still a couple of people I could never get pictures from. Once the pictures are there it should be good to go.
